

Audio Forensics Analysis

Who Is It For: Any employee of an agency that is currently doing or will be doing audio forensics analysis.

Course Overview: An introduction to the fundamentals of processing audio for clarification. This three-day hands-on workshop will cover speech and noise fundamentals, how to start with the "Best Evidence," and basic audio enhancement principles. Students will learn how to improve common audio recording issues with software tools. Attendees will also receive information on forensic audio reference resources as well as an overview of other enhancement tools currently available.

Objectives:

1. Understand Forensic Audio Core Competencies
2. Work with Forensic Audio
3. Knowledge of Forensic Audio Best Practices

Duration: 3 days

Minimum and Maximum Number of Students: 14/28

Number of Instructors: 1
